

ÁNGEL VIEJOBUENO

Microsoft Stack Tech Lead | AI-Assisted .NET Architecture, ASP.NET Core & Microservices

Madrid, Spain / Remote | +34 649 78 98 51 | angel.viejobueno@gmail.com | Spanish nationality

Professional Summary

Senior .NET Backend Developer with 20+ years of experience designing, building and modernising backend, integration and cloud solutions for financial services, travel, telecom, automotive connectivity, public sector and enterprise platforms. Strong background in C#, ASP.NET Core, microservices, APIs, event-driven architectures, messaging, Azure/AWS cloud services, SQL/NoSQL databases, testing and CI/CD. Experienced as Tech Lead and senior contributor, translating architectural decisions into maintainable code, mentoring teams and improving delivery practices. In the most recent role, led the practical adoption of Claude Code for enterprise legacy-to-.NET 10 modernisation, creating AI-assisted engineering workflows that accelerate analysis, refactoring, documentation and technical validation while preserving human ownership of architecture and quality.

Target Profile

Backend Architecture	Cloud & Distributed Systems	AI-assisted Delivery
C#, .NET 8/9/10, ASP.NET Core, REST APIs, GraphQL, SOLID, patterns, clean maintainability.	Microservices, event-driven systems, RabbitMQ, Service Bus, SNS/SQS, Docker, Azure and AWS.	Claude Code workflows: agents, hooks, prompting, context rules, token strategy, legacy-code analysis.

Core Technical Skills

Languages & Frameworks: C#, .NET Core / .NET 5-10, ASP.NET Core, ASP.NET MVC, LINQ, WCF, WPF, Entity Framework, xUnit, Moq.

Architecture: Microservices, REST APIs, GraphQL / HotChocolate, SOA, Event Sourcing, distributed systems, SOLID, TDD, design patterns, clean code.

Cloud & DevOps: Azure Functions, Azure App Services, Azure Service Bus, Azure Storage, Azure Cosmos DB, Azure SQL, Azure DevOps, GitHub, Bitbucket, Docker, AWS SNS/SQS/DynamoDB.

Messaging & Integration: RabbitMQ, MSMQ, NServiceBus, BizTalk Server, IBM API Connect, TIBCO BW, API and middleware integration.

Databases & Observability: SQL Server, PostgreSQL, MongoDB, DynamoDB, Serilog, Application Insights, SonarQube.

AI Engineering: Claude Code, AI-assisted refactoring, prompt engineering, agent setup, automation hooks, documentation generation, migration support.

Selected Professional Experience

Senior Microsoft .NET Backend Developer / Tech Lead | Hiberus - Copernicus, Financial Sector

Almería, Spain - Remote | Nov 2025 - Present

Tech: Claude Code, .NET 10, C#, LINQ, Git, Visual Studio / VS Code, ASP.NET MVC modernisation, API development

- Contributing to Kepler, an enterprise modernisation initiative migrating legacy .NET / ASP.NET MVC applications to .NET 10.
- Designed and optimised the team workflow for Claude Code adoption, configuring it around Anthropic best practices and adapting it to enterprise migration constraints.
- Defined specialised Claude Code agents, automation hooks, prompting patterns, context rules and token-economy strategies to make legacy-code work more accurate, consistent and repeatable.
- Standardised AI-assisted activities: code analysis, dependency detection, refactoring proposals, technical documentation, validation support and change-impact analysis.
- Provided senior technical oversight so AI-generated proposals remain aligned with architecture, maintainability, code quality and safe delivery practices.

Senior Microsoft .NET Backend Developer | UST España & Latam - Schroders, Financial Sector

Almería, Spain - Remote | Apr 2025 - Nov 2025

Tech: .NET 8/9, C#, Azure Functions, Azure Storage, Azure Cosmos DB, Azure Service Bus, microservices, GitHub, API development

- Worked on an anti-fraud screening payment platform in Azure, enabling payment screening against third-party services before daily operations were processed.
- Built and evolved serverless and microservice components with Azure Functions and Service Bus, contributing to secure, scalable payment-processing workflows.

- Collaborated in a financial-services environment where reliability, traceability and maintainable backend design were critical delivery requirements.

Senior Microsoft .NET Backend Developer | Cubic Telecom, Automotive Connectivity

Almería, Spain - Remote | Sep 2024 - Feb 2025

Tech: .NET 8, C#, REST APIs, MVC, microservices, Service Fabric, Azure Storage, Azure Service Bus, Azure DevOps, Azure Repos, Scrum

- Participated in the Consumer Portal project, providing connectivity services to users across multiple automotive brands and telecom operators.
- Developed and maintained backend services and APIs in a distributed environment, supporting product evolution and operational stability.

Senior Microsoft .NET Backend Developer | Cocomore AG - Samsung Germany

Almería, Spain - Remote | May 2022 - Aug 2024

Tech: .NET 6, C#, REST APIs, GraphQL / HotChocolate, microservices, Docker, RabbitMQ, MongoDB, SQL Server, Azure App Services, ACI, ACR, Notification Hub, Cosmos DB, Azure SQL, Application Insights, Redis, Azure DevOps

- Delivered backend features and bug fixes across Samsung Business Portal and Product Database 2, supporting enterprise digital platforms for electronic-device sales.
- Contributed to the rewrite of a monolithic Product Database into decoupled .NET microservices, extracting reusable cross-service functionality across Samsung systems.
- Implemented GraphQL services with HotChocolate and containerised .NET services with Docker, deployed into Azure-based infrastructure.
- Worked with messaging, persistence, observability and DevOps practices across a complex cloud ecosystem.

Senior Microsoft .NET Backend Developer | AgioGlobal Technology - TUI, Travel Sector

Almería, Spain - Remote | May 2021 - May 2022

Tech: .NET 5/6, C#, REST APIs, microservices, Docker, AWS SNS/SQS, DynamoDB, PostgreSQL, Autofac, MediatR, FluentValidation, Rider, GitHub, Scrum

- Evolved and maintained a .NET insurance-domain service within TUI's distributed travel platform.
- Worked on an event-sourcing application consuming and publishing JSON events through AWS SNS/SQS and persisting data in DynamoDB and PostgreSQL.
- Used mediator, validation and dependency-injection patterns to keep backend components maintainable and testable.

Senior Backend Developer | Dimatica / Nexlore - ACS Group

Madrid, Spain - Remote | Jun 2020 - May 2021

Tech: .NET 5, C#, GraphQL, Java Gradle, Keycloak, Docker, RabbitMQ, Azure, Cosmos DB, Azure SQL, Azure DevOps

- Developed a Java plugin extending Keycloak authentication and authorization capabilities for access to company microservices.
- Built a .NET GraphQL server that mediated between GraphQL requests and Keycloak integration logic, using RabbitMQ for asynchronous mutation processing.
- Applied event-sourcing and observer-style processing to decouple service behaviour from messaging infrastructure.

Senior Microsoft .NET Backend Developer | Scalian - Alstom, Transport Sector

Madrid, Spain - On site | Nov 2019 - May 2020

Tech: C#, REST APIs, WPF, RabbitMQ, NServiceBus, microservices, SQL Server, Entity Framework, Azure DevOps, SonarQube

- Developed backend and device-integration functionality for Iconis Security Manager, Alstom software used to manage railway operations and infrastructure devices.
- Worked in an Agile team with CI/CD, Azure DevOps, SonarQube and a test suite exceeding 4,500 automated tests.

Additional Relevant Experience

Unisys - Iberia | Senior .NET Backend Developer | 2019

Designed and built an integration service connecting a Java REST API with Iberia Host through COM+, packaged as a WCF service hosted in Windows Service; applied SOLID and xUnit testing.

Santander Bank UK | Senior Software Developer / BizTalk Developer | 2015-2019

Delivered middleware, API and integration solutions for banking domains including customer communications, sales APIs and BizTalk platform upgrade; worked with WCF, BizTalk, C#, IBM API Connect, OpenShift, Jenkins, Spring Boot, MSMQ and SOA services.

Deloitte - Department of Social Protection, Ireland | Senior .NET Developer | 2016-2017

Contributed to a messaging framework using WCF, BizTalk, Event Source and SOA patterns; worked closely with architect and client and supported junior developers.

Redcom Cibernético - Repsol | Senior SharePoint Developer | 2013-2015

Maintained and evolved SharePoint/.NET solutions using C#, ASP.NET, WCF, SQL Server and Entity Framework.

Delaware / Everis (NTT Data) / earlier consultancies | Senior .NET / Integration Developer | 2000-2013

Built backend, web, desktop and integration systems using C#, VB.NET, ASP.NET, WCF, BizTalk, SQL Server, Oracle, XML/XSD and enterprise integration practices across public, insurance, logistics and industrial sectors.

Leadership & Delivery Strengths

- Tech Lead mindset: pragmatic architecture, code maintainability, technical decision-making and team enablement.
- Strong experience in financial-services and enterprise environments with reliability, auditability and secure integrations.
- Hands-on senior developer who can design, code, review, test, document and guide delivery without losing technical depth.
- Comfortable modernising legacy systems incrementally, reducing coupling and introducing cloud-native and event-driven patterns.

Education & Certifications

- Azure Fundamentals Certification.
- Certificate of Higher Education / HNC (FPII), Industrial Electronics, Electricity and Electronics - High School Salvador Allende, Madrid.
- General Certificate of Secondary Education (BUP/GCSE equivalent) - High School Dionisio Aguado, Madrid.
- Selected ongoing learning: DevOps Cloud Computing, Terraform for AWS, Mathematical Foundations for AI, Elements of AI - University of Helsinki, RabbitMQ for .NET Developers, Understanding ASP.NET Core, Web API Design, Microservices with MassTransit and RabbitMQ.
